The textbook is divided into five sections:

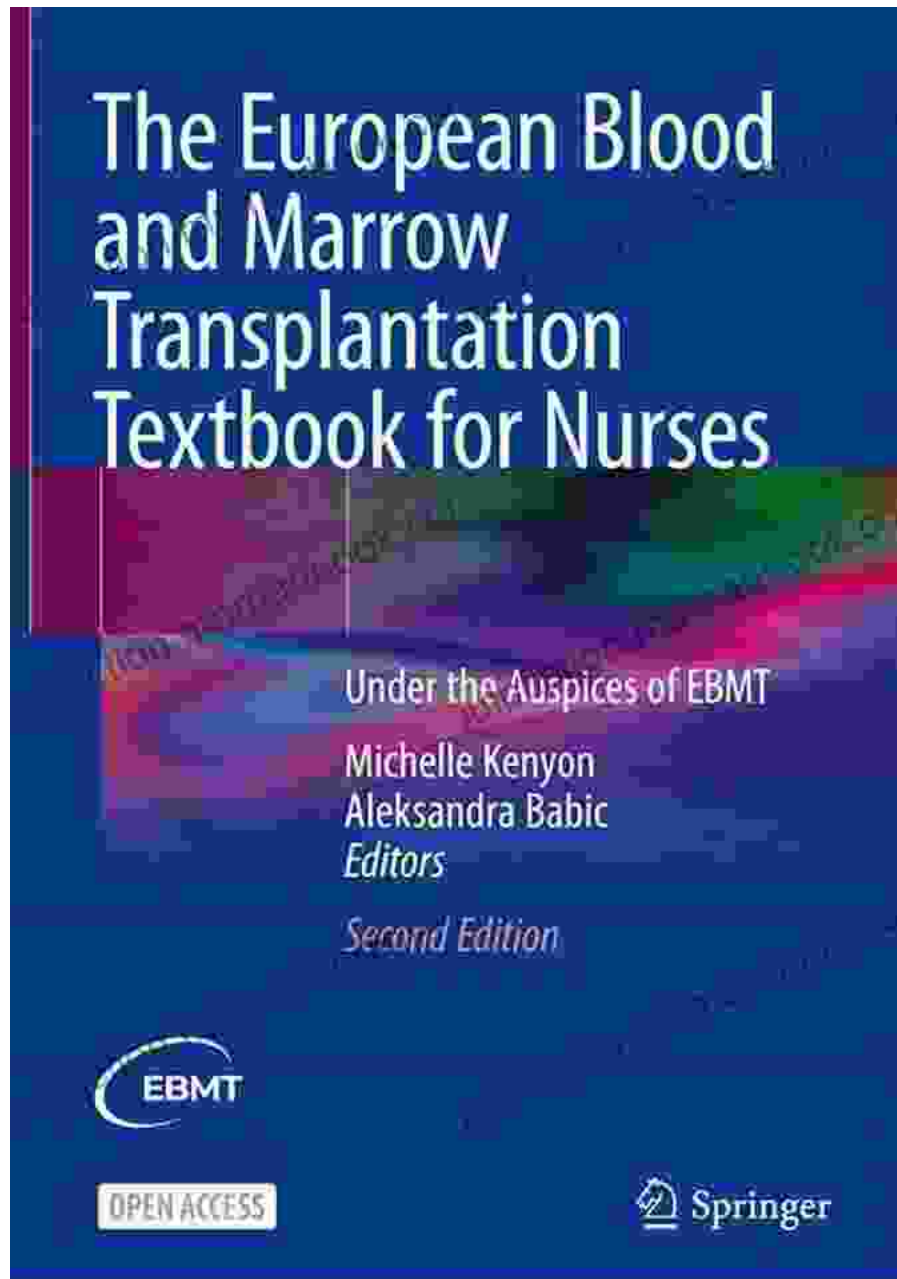

1. to HSCT
2. Pre-transplant care
3. Transplantation
4. Post-transplant care
5. Special considerations

The first section provides an overview of HSCT, including the different types of HSCT, the indications for HSCT, and the risks and benefits of HSCT. The second section discusses pre-transplant care, including the assessment of the patient's eligibility for HSCT, the preparation of the patient for HSCT, and the management of complications during pre-transplant care.

The third section discusses transplantation, including the different types of HSCT, the procedure for HSCT, and the management of complications during HSCT. The fourth section discusses post-transplant care, including the management of complications after HSCT, the follow-up of patients after HSCT, and the long-term survivorship of patients after HSCT.

The fifth section discusses special considerations, including the care of children undergoing HSCT, the care of patients with co-morbidities undergoing HSCT, and the care of patients undergoing HSCT in developing countries.

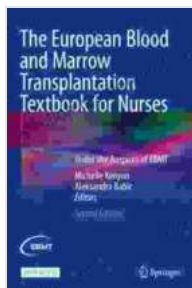

The European Blood and Marrow Transplantation Textbook for Nurses is a valuable resource for nurses who care for patients undergoing HSCT. It provides nurses with the knowledge and skills they need to provide safe and effective care for these patients.

About the Editor
